# Temper Frontend Assessment

The following design is given to you to build a prototype using Vue.js and Vuex. Show off your TDD and Clean Coding skills.

Requirements

1. Display the first 5 posts from https://jsonplaceholder.typicode.com/posts.
2. The order of these posts can be changed by clicking on the up / down arrows.
3. Each ordering action taken should be listed in the panel on the right.
4. A user can time travel to a previous state by clicking on the time travel button.
5. Use Tailwind css for styling

Scorecard

Your result will be scored on:

Code Readability
ES6 knowledge
Naming
Approach to the problem/solution
Component Breakdown
State Structure
Animations (Transitions)
Styling
Testing
